Complete guide on designing and installing your own DIY electrical system in a camper van conversion. Free wiring diagram and tutorial inside!

Electrical System: Build Guide for DIY Camper Van

A trailer is an unpowered vehicle towed by a powered vehicle. It is commonly used for the transport of goods and materials. Sometimes recreational vehicles, travel trailers, or mobile homes with limited living facilities where people can camp or stay have been referred to as trailers. In earlier days, many such vehicles were towable trailers.

Trailer (vehicle) - Wikipedia

Volts For the electrons to flow we need a force to cause them to move. This force is caused by the difference in voltage between one side of a load versus the other side and is known as the electrical potential difference. It is also commonly referred to as potential or voltage drop. It is this difference in voltage that is the driving force, not the voltage itself, which pushes the current ...

UPDATED 24 January 2012 What We Need for 21st Century Combat? "The way to build aircraft or anything else worthwhile is to think out quietly every detail, analyze every situation that may possibly occur, and, when you have it all worked out in practical sequence in your mind, raise heaven and earth and never stop until you have produced the thing you have started to make."
